Anode Electric Pvt. Ltd.

www.anocab.com sales@anocab.com \$\varphi\$: 1800 27000 75

Company Profile

"Anode Electric Pvt. Ltd. is one of the leading Indian Cable manufacturers, manufacturing all types of cables specializing in Power cables, Control Cables, House Wires and Copper Flexible cables. Established in 2015, the house of Anode Electric is an ISO 9001:2008 certified. Company with a brand presence across the India. Through its stringent quality control, customer satisfaction and diversified product mix. Anode Cables in the course of these years, has witnessed a steady growth in terms of sales volume, manufacturing facilities and profitability. We have rendered our services to a plethora of customers from all sections like State Utilities, Public Sector Undertakings and many others. We believe in the concept "Quality First". With the help of continuous perseverance of quality control program, we renew our commitment to ensure reliable quality at a competitive price. Anode Cables has highly sophisticated in-house labs equipped with latest microprocessor based equipments, stage inspection space, computerized spectrometer for instant metal analysis, sophisticated R&D division. Quality Assurance tests are conducted at every step of the manufacturing process, from raw materials to finished goods. Our full fledged manufacturing facilities are having most modern & latest Plant & Machineries, conductor drawing and stranding machines and insulation machines. The facilities are located at Jabalpur District of Madhya Pradesh. We trust that you would kindly appreciate our achievements in this regard which was possible only due to our continuously modernizing & expanding manufacturing activities. Anode Cables has successfully incorporated innovation in the production processes to enhance productivity while minimizing time. Implementation of top quality and advanced systems and Software offer seamless flow of information between various departments for smooth functioning." We are manufacturer of huge variety of wire and cable in compliance with National and International Standards. Our focus to introduce a trustful brand to the world.

Multistrand Single Core Copper Wire

Application

Suitable for fixed installation in Residential, Agriculture and Industrial Application.

Features

High Temperature Resistance

- High quality multilayer pvc having grater IR Value
- * REACH and RoHS Compliant Cable
- * Flame Retardant Cable with higher Oxygen Index
- * Anti-Rodent, Anti-Termite
- * 100 % Pure Electrolytic grade Copper
- * Super flexible conductor
- * 100 % Conductivity

Technical Data

Reference : IS 694:2010

Voltage Grade: Up to and including 1100V

Conductor : Electrolytic Grade Copper class - 2, 5, as per IS: 8130:2013

Insulation : PVC confirming to IS-5831 and Formulated With FR Properties and Heat

resistance up to 85 °C.

FRLSH & ZHFR insulation Type A/C 70/85°C.

Colours : Red, yellow, blue, black & other Colour on customer demand

Marking : The cables are printed with marking of 'ANOCAB'.

Packing : 90 mtr. coil is packed in protective Plastic bag & Longer length on

Customer demand.

Anode Electric Pvt. Ltd.

Multi Core Copper Cable

Application

Flexible cord cables are suitable for single phase and three phase Connection.

IS 694:2010

High Temperature Resistance

99.97% pure copper

Features

- These cables are suitable to use for Low voltage grade application.
- Transferring & Connecting Power for residential & commercial infrastructure.
- These are also useful for control of motors & other electric appliances.
- PVC insulated & sheathed multicore cables suitable for general purpose for Temperature range -15°C to 70°C.

Technical Data

Reference : IS 694:2010

Conductor : Electrolytic grade annealed copper Class 5 as per IS 8130

Insulation : PVC Type - A, HR PVC Type - C, as per IS 5831

Colour of core : Red & black for 2 core cable, red, yellow, blue for 3 core cable, red, yellow, blue

black for 4 core cable

Sheath : PVC Type ST-1, PVC Type - ST 2 as per IS 5831

Colour of sheath : Black and Other Colour as per Customer demand

Voltage Rating : Up to and including 450/750V

Packing & Marking: Standard packing of 100/300/500 mtr. in coil. & Other length available on

request, cables are printed with marking of 'ANOCAB'.

A Positive Connection....

PVC Insulated Submersible Cable

Application

flexible cord cables are suitable for Submersible Pump Connection.

These cables are suitable to use for Low voltage grade application. Transferring & Connecting Power for residential & commercial infrastructure. These are also useful for control of motors & other electric appliances.

Features

- · High quality multilayer PVC having greater IR Value.
- REACH and RoHS Compliant Cable.
- Flame Retardant Cable with higher Oxygen Index.
- · Anti-Rodent, Anti-Termite.
- · 100 % Pure EC Grade Aluminium.
- Super Annealed Conductor.

Technical Data

ISO & BIS Certified Company

Conductor : Electrolytic grade annealed copper Class 2, 5 as per IS 8130.

Insulation : PVC Type A as per IS:5831

Colour of core : Red, yellow, blue .

Sheath : PVC Type ST-1, PVC Type - ST 2 as per IS 5831
Colour of sheath : Black and Other Colour as per Customer demand

Voltage Rating : Up to and including 1100V

Packing & Marking : Standard packing of 300/500 mtr. in coil. & Other length available

on request, cables are printed with marking of 'ANOCAB'.

Cable Design Parameters

Technical Data

Reference : IS 1554 PT-1

Conductor : CC Grade Copper Class 1 & 2 as per IS 8130

Insulation : PVC Type - A,C as per IS 5831,

Colour of core : Red & black for 2 core cable, red, yellow, blue for 3 core

cable, red, yellow, blue & black for 4 core cable

Sheath : PVC Type ST-1, ST-2, PVC Type - ST 2 as per IS 5831

Colour of sheath : Black and Other Colour as per requirement

Voltage Rating : Up to and including 1100 Volt

Packing & Marking: Standard packing of 500 mtr. in coil. & Other length available

on request, cables are printed with marking of 'ANOCAB'.

Cable Design Parameters

Armoured/Unarmoured PVC Insulated & Sheathed Control Cable.

Telecom Switch Board Cables

DOT G/WIR=06/02

Features

Telecom/Switch board Cables for Indoor Telephones

. High quality multilayer PVC having greater IR Value

· Flame Retardant Cable with higher Oxygen Index

pure copper

Reference : DOT TEC Spec No: G/WIR-06/02

Test Voltage: 2000 V spark Tester

. REACH and RoHS Compliant Cable

· Anti-Rodent, Anti-Termite

Super Annealed Conductor

Conductor : Annealed Tinned Copper Conductor

Insulation : Hard PVC confirming to IS-13176 (1991) type-2.

Colours : White, Blue, Orange, Green, Brown & Grey Colour as per DOT

Marking : The cables are printed with marking of 'ANOCAB' .

Packing : 100 mtr. & 200 mtr. coil is packed in protective Plastic bag .

Cable Design Parameters

Unarmoured Hard Grade PVC insulated ATC Twisted Pair Cable

High Temperature Resistance

A Positive Connection....

Multicore XLPE Insulated Aluminium Un-Armoured Cable

Application

These cables are suitable for fixed installation & able to serve power for Transmission & distribution Purpose. XLPE insulated & sheathed multicore cables suitable for general purpose in Temperature range -30°C to 90°C.

Features

- Premium Quality Compound having Protection against UV, O3, Oil Grease and different weather conditions.
- 100 % Pure EC Grade Aluminium
- Heavy duty Cable suitable for outdoor installation.

Technical Data

Reference : IS 7098 PT-1

Conductor : EC Grade Aluminium Class 1 & 2 as per IS 8130

Insulation : XLPE Insulation as per 7098 PT-1

Colour of core : Red & black for 2 core cable, red, yellow, blue for 3 core

cable, red, yellow, blue & black for 4 core cable

Sheath : PVC Type ST-1, PVC Type - ST 2 as per IS 5831
Colour of sheath : Black and other colour as per requirement

Voltage Rating : Up to and including 1100 Volt

Packing & Marking: Standard packing of 500 mtr. in coil. & Other length available

on request, cables are printed with marking of 'ANOCAB'.

Anode Electric Pvt. Ltd.

Aerial Bunch Cable

Application

LT Over Head Power Distribution

High Temperature

- U.V. Radiation Protected
- · Higher Current Carrying Capacity
- High temperature Range -30 °C to 90°C

Technical Data

Reference : IS-14255:1995

Rated Voltage: 1100 Volts

Conductor : Class-2 asper IS-8130

Insulation : Cross link Polyethylene Insulated

: Aluminium Alloy Conductor as per IS-398 Pt-4 Messenger

Cable Design Parameters

Aerial Bunch cable with Bare Messenger & Street Light

Anode Electric Pvt. Ltd.

Paper Covered Aluminium Conductor

Application

Winding of Electrical Machine (Transformer)

Features

• 100 % Pure EC Grade Aluminium.

99.97%

Reference : IS-6162 (Part-1):1971

Conductor : Round Aluminium Conductor Pure EC grade

Confirming to IS 4026-1969

Insulation : Double Layer of Paper Covered with O, F & S Grade as

per Customer Requirement

Resistivity Resistivity of Material 0.028264 Ohm mm2/m at 20°C

Test Tested at 5.5 KV to 10 KV

pure Aluminium

Anode Electric Pvt. Ltd.

Aluminium Conductor Galvanised Steel Reinforced

Application

Features

Over Head Power Transmission Purposes

• 100 % Pure EC Grade Aluminium.

High Temperature

Reference : IS-398 (PT-2):1996

Conductor : Conductor Containing Aluminium & Galvanised

Steel Wire Built in Concentric Layer.

Conductor Material Conforming to IS:5484:1978

Resistivity of Material 0.028264 Ohm mm²/m at 20°C

Heavy duty Cable suitable for outdoor installation.
